ABOUT ME

I'm Mohamed Aly, a dedicated front-end web developer with a strong passion for learning and a keen eye for detail. I'm a 36-year-old who embarked on a transformative journey in 2018, transitioning from an administrative career to the world of programming. This shift was driven by my unwavering enthusiasm for acquiring new skills and embracing challenges. I made the decision to learn programming during my work, fully understanding the importance of responsibility. Being a father, I know firsthand the significance of attention to detail in both personal and professional life. Since then, I've been on a continuous learning path, honing my programming skills and undertaking various projects that allowed me to apply what I've learned. I'm proud to have learned the fundamentals of Python, data auditing, and took a Professional certification in Google IT. My web development journey has included mastering HTML, CSS, Bootstrap, JavaScript, and React. One of my favorite aspects of development is taking projects from scratch and turning ideas into functional and beautiful websites. My dedication to this field has been unwavering, and I'm continuously seeking opportunities to learn, adapt, and grow in this dynamic industry. Additionally, I'm currently preparing for the B1 Deutsch (German) language certification, showcasing my commitment to mastering new domains. Feel free to explore my portfolio to see some of the projects I've worked on. If you have any questions or would like to collaborate, please don't hesitate to get in touch.
